

ROBERTO RODRÍGUEZ CASTILLO

FRONT END DEVELOPER

+52 662 124 7612 | rob@robodriguez.dev | linkedin.com/in/roberto-rodriguez-frontend-engineer | github.com/roberrcast

PROFESSIONAL PROFILE

Professional in theology and bilingual interpretation with experience in customer service and medical and legal/judicial interpretation. Knowledge of JavaScript, CSS, SASS, React, Git, and GitHub. Attention to detail, adaptability, professional ethics, problem-solving, critical thinking, creativity, and innovation. I am currently developing my skills as a front-end engineer to apply my analytical and creative abilities to technology development.

EDUCATION

Front End Engineering, EBAC, 2024-2026.

Bachelor in Theology, Universidad Madero, 2019 - 2022.

PROFESSIONAL EXPERIENCE

Human Quality, LanguageLine, Mexicali, Baja California

Marzo 2023 – Abril 2024

Bilingual Interpreter (English - Spanish)

- I was promoted from customer service interpreter (L3) to medical interpreter (L4) in less than a month, and from medical interpreter to legal/judicial interpreter (L5) in 10 months.
 - I handled over 1,500 highly complex calls in the areas of customer service, medical, emergency, and legal/judicial services, facilitating communication for people with limited (or no) English proficiency.
 - I paid close attention to detail to interpret linguistic nuances and facilitate effective communication.
 - I researched and mastered medical and legal terminology in real time during calls, creating a personal glossary to ensure accuracy.
-

RELEVANT PROJECTS

Escuela Británica de Artes Creativas y Tecnología. Mexicali, B.C.

2025

Virtual Gallery(API consumption, React, Vite, TypeScript)

- Developed a complete application for a virtual gallery by calling an API from the Art Institute of Chicago.
- Used React + Vite and TypeScript to ensure modularity, speed, and type safety in the application.
- Used Vitest for unit testing.
- Managed JSON responses from the API and application states using Redux Toolkit.
- The gallery was deployed using Netlify.

Caras Project (React, Vite, TypeScript, Vitest)

- Built a mock newsletter landing page for Caras magazine using React + Vite.
- TypeScript for type safety.
- Implemented email authentication using TypeScript.
- Used Vitest for form validation and unit testing.
- Deployed the project using Netlify.

E-commerce (Origen & Grano)

- Simulated an e-commerce site using React + Vite.
- Used Styled-Components to develop a visually appealing interface.
- Used TypeScript for type safety.
- Form validation.
- Project deployed using Netlify.

Universidad Madero. Ciudad Constitución, B.C.S.

2022

Suggestions for a Comprehensive Reading of the Word of God

- I researched reading comprehension in a religious community through a documentary research and field study.

- I designed and administered an assessment to evaluate the reading comprehension level of that community.
 - I developed a solution, based on a conjunction-based methodology, with the goal of facilitating and improving reading comprehension in that community.
